To the extent that the purposes authorized herein are inconsistent with the adopted capital or temporary capital budget, a revised capital or temporary capital budget has been filed with the Division of Local Government Services.

Section 6. The following additional matters are hereby determined, declared, recited and stated:

(a) The purposes described in Section 3 of this bond ordinance are not current expenses. They are all improvements that the County may lawfully undertake as general improvements, and no part of the costs thereof has been or shall be specially assessed on property specially benefitted thereby.

(b) The average period of usefulness, computed on the basis of the respective amounts of obligations authorized for each purpose and the reasonable life thereof within the limitations of the Local Bond Law, is 18.09 years.

(c) The Supplemental Debt Statement required by the Local Bond Law has been duly prepared and filed in the office of the Clerk, and a complete executed duplicate thereof has been filed in the office of the Director of the Division of Local Government Services in the
Department of Community Affairs of the State of New Jersey. Such statement shows that the
gross debt of the County as defined in the Local Bond Law is increased by the authorization of
the bonds and notes provided in this bond ordinance by $8,429,160, and the obligations
authorized herein will be within all debt limitations prescribed by that Law.

(d) An aggregate amount not exceeding $700,000 for items of expense listed in and
permitted under N.J.S.A. 40A:2-20 is included in the estimated costs indicated herein for the
purposes or improvements.

Section 7. The County hereby declares the intent of the County to issue the bonds or
bond anticipation notes in the amount authorized in Section 2 of this bond ordinance and to use
proceeds to pay or reimburse expenditures for the costs of the purposes described in Section 3 of
this bond ordinance. This Section 7 is a declaration of intent within the meaning and for purposes
of Treasury Regulations.

Section 8. Any grant moneys received for the purposes described in Section 3 hereof
shall be applied either to direct payment of the cost of the improvements or to payment of the
obligations issued pursuant to this ordinance. The amount of obligations authorized but not
issued hereunder shall be reduced to the extent that such funds are so used.

Section 9. The County Director of Finance of the County is hereby authorized to
prepare and to update from time to time as necessary a financial disclosure document to be
distributed in connection with the sale of obligations of the County and to execute such
disclosure document on behalf of the County. The County Director of Finance is further
authorized to enter into the appropriate undertaking to provide secondary market disclosure on
behalf of the County pursuant to Rule 15c2-12 of the Securities and Exchange Commission (the
"Rule") for the benefit of holders and beneficial owners of obligations of the County and to
amend such undertaking from time to time in connection with any change in law, or
interpretation thereof, provided such undertaking is and continues to be, in the opinion of a nationally recognized bond counsel, consistent with the requirements of the Rule. In the event that the County fails to comply with its undertaking, the County shall not be liable for any monetary damages, and the remedy shall be limited to specific performance of the undertaking.

Section 10. The full faith and credit of the County are hereby pledged to the punctual payment of the principal of and the interest on the obligations authorized by this bond ordinance. The obligations shall be direct, unlimited obligations of the County, and the County shall be obligated to levy *ad valorem* taxes upon all the taxable real property within the County for the payment of the obligations and the interest thereon without limitation of rate or amount.

Section 11. This bond ordinance shall take effect 20 days after the first publication thereof after final adoption, as provided by the Local Bond Law.

Re: Request for additional $30,000 in funding for the Mullin & Lonergan Contract in support of the Passaic County CDBG-DR Program

Dear Ms. Hoffman:

Mullin & Lonergan was awarded a $150,000 ($50,000 per annum) contract by the Passaic County Board of Chosen Freeholders to assist the County of Passaic in the implementation of the Community Development Block Grant Disaster Recovery (CDBG-DR) program on February 26, 2013 for a contract period of January 1, 2013 through December 31, 2015. An additional no-cost time extension of our contract was adopted extending the contract to September 30, 2017.

The Passaic County Board of Chosen Freeholders have extended our contract to September 30, 2017, beyond the anticipated time, 3 years, to complete the CDBG-DR program. In addition, the scope of work for the CDBG-DR program has been increased to include the implementation of Phase III and Phase IV of the reconstruction of the McDanold Brook in the City of Passaic. The original scope of work only included the implementation of Phase I and II. The expansion to McDanold Brook Phase III and Phase IV greatly increases the amount of staff time that must be devoted to review requests for proposals to ensure compliance with US HUD regulations; implement wage rate monitoring, including worker interviews; and development of reports to US HUD and the NJ Department of Community Development for this extended time period.
There only remains approximately $20,000 left in the original contract, not enough to compensate our staff for work through September 30, 2017. Therefore, at this time we are requesting an increase in our contract of $30,000, which will represent a total contract amount not to exceed $180,000.

Thank you for your consideration. Please contact me with any questions.

Sincerely,

Re: Passaic County Police Academy Parking Lot  
Township of Wayne  
Final Acceptance & Final Payment  
Braen Stone Industries

Members of the Board:

The construction of the Passaic County Parking Lot has been completed and conforms to the contract and County standards.

Final payment and acceptance for this project was discussed at the Public Works Committee meeting of October 17, 2016 and recommended for approval to the full Board.

Based upon the above, I recommend that the Board of Chosen Freeholders adopt the necessary Resolution authorizing the acceptance of the project and directing the Director of Finance to issue Final Payment in the amount of $8227.93 to Braen Stone Industries. As this project was completed in 2007 with the exception of removing a stockpile, it is recommended that the maintenance bond requirement be waived.

RE: ACCEPTANCE OF PASSAIC COUNTY CULTURAL & HERITAGE ARTS RE-GRANT

Members of the Board:

We are seeking a resolution authorizing the acceptance of an arts re-grant received by the Passaic County Cultural & Heritage Council (PCCHC) for summer programming at the County’s Courthouse Plaza.

The Public Works and Building & Grounds Committee at their meeting of February 27, 2017 recommended that the full Board authorize acceptance of this re-grant. For reference, I have attached the County of Passaic’s agreement with PCCHC. The agreement clarifies the execution of a concert series with performances by William Paterson University’s Jazz Program in the Courthouse Plaza dated December 19, 2016. Also attached is the letter we received notifying us of the re-grant award, dated February 14, 2017.

I encourage you to consider adopting this resolution to authorize and support the continuation of this program. If you have any questions, please do not hesitate to contact me.

Sincerely

RE: Replacement of Warwick Turnpike Bridge (Structure No. 1600-447) Over Little Green Brook

Dear Board of Chosen Freeholders, County Clerk and Procumente Agent,

I am writing on behalf of Reivax Contracting, the lowest responsive bidder on the project referenced above. We would like to clarify that the proposal presented this morning contained a negligible mathematical error. We failed to account for some bid items when tabulating the total amount in an excel spreadsheet. We erroneously listed the total sum of $724,584.00. The correct amount of $1,103,719.00 can be verified once all the bid items are added. Therefore, Reivax's proposal is still the most auspicious. Our miscalculation is not a fatal fault to and as such we would expect to have the contract awarded to us. I am making myself available to discuss the matter further if necessary.

Sincerely,

PROJECT OVERVIEW

Connolly & Hickey Historical Architects, LLC is pleased to present a proposal to the County of Passaic (County) to prepare contract documents and provide bidding and contract administration services for the Restoration & Rehabilitation of the Vanderhoef House in Wessel Brooke Park, Clifton. The following outlines the scope of services, the qualifications of the project team, the project approach and the cost proposal to assist the County in the execution of this restoration work.

Vanderhoef House
The Vanderhoef House is a fine example of an eighteenth-century Dutch-American stone house. The Vanderhoef family was a Bergen County Dutch agricultural family that purchased land throughout northern New Jersey beginning in the eighteenth century or earlier. Albert Vanderhoef likely constructed the east portion of the Vanderhoef House circa 1720, and the northern wing was added circa 1820. The building was additionally altered during the nineteenth century to accommodate the needs of the occupants and changing architectural tastes. In 1937, the Vanderhoef House was documented by the Historic American Building Survey (HABS) program. The County of Passaic acquired the Vanderhoef House along with the surrounding property to create a public park, and in 1937 the Parks Commission undertook a restoration of the House along with the development of Wessel Brooke Park.

The Vanderhoef House has recently gone through a period of disuse, which resulted in deteriorated conditions; however, the County is currently in the process of stabilizing the structure and planning for its future. A Conditions Assessment Report was completed in January 2017, and some upgrades were undertaken while the report was being prepared. The County would now like to rehabilitate the building for use by the Department of Parks and the Department of Cultural & Historic Affairs including a visitor center, interpretive room, flexible meeting space, public restrooms, and offices. This proposal for professional services is to review existing conditions and to develop design and contract documents for the exterior and interior restoration and rehabilitation of the Vanderhoef House. This project may be undertaken in phases depending on the available funding. Our firm will work with the County in developing a bid strategy that allows for flexibility in bidding including the use of unit costs, allowances, and bid alternates. Once funding for the construction project is obtained, Connolly & Hickey will also assist the County in the pre-qualification of general restoration contractors, bidding the project and once a contract is awarded, in the administration of the contract during construction. All proposed work shall be in compliance with The Secretary of the Interior’s Standards for Rehabilitation; while the Vanderhoef House is not currently listed on the New Jersey or National Registers of Historic Places, the County will be pursuing listing.

Connolly & Hickey reviewed the Conditions Assessment Report prepared for the Vanderhoef House and found it to be thorough with regard to conditions and recommendations. However, the report focused on conditions and not necessarily the building’s chronology of construction. A chronology of construction is an important resource tool upon which to make informed decisions on the treatment of existing fabric as it relates to restoration and rehabilitation. As such, as part of any proposed project, the firm will collate all information from the existing documentation and histories, as well as from looking at the physical fabric. Based on this research and an examination of the research being conducted for the National Register nomination (by others) we will develop a recommendation on a Period of Significance upon which restoration and rehabilitation decisions will be made. The development of the chronology and the period of significance will run concurrent with the programming phase. The programming phase will look at the proposed use for the building, undertake a code analysis, and make detailed recommendations for adaptive use including schematic design options.

Official Resolution #: R20170185
Connolly & Hickey Historical Architects is an architecture firm that specializes in the restoration and rehabilitation of historic properties with a focus on properties located in New Jersey. The firm provides a full range of architecture and preservation services including planning, stabilization, restoration and rehabilitation for a variety of cultural resources. Our firm focuses on the practice of historical architecture because of our belief that the presence of older buildings enhances and graces the built environment providing a connection to local heritage and fostering stronger communities. Extending the useful life of existing buildings through thoughtful and well-planned restorations and rehabilitations is an area of specialty requiring experienced professionals. Please refer to Section 6 for a sampling of projects that our firm has undertaken since our inception.

Connolly & Hickey is a full-service firm that can meet the individual needs of each of our clients and tailor those services to each project. We understand that each building has its own identity, characteristics and needs, and as such, we develop a project team that is specifically suited to the project goals and objectives. Although much of the services provided are generated by Connolly & Hickey, we recognize the need to build a project team consisting of a variety of consultants. For the Vanderhoof House, our project team will include James Huffman, P.E., structural engineer, and KSI Consulting Engineers, who will provide MEP engineering services.

Thomas B. Connolly, AIA, and Margaret M. Hickey, AIA, will manage the Project Team, provide direct contact to the client and coordinate all requirements amongst in-house personnel and our consultant. The Project Team has worked together on numerous projects in the past and therefore has the ability and expertise to successfully deliver this project to the County in a timely manner, satisfying the programmatic requirements and consistent with the governing standards for the preservation of historic buildings. The following is a summary of the experience of each team member including their role in the preparation of the design and contract documents. Each team member has experience with applying the Secretary of the Interior’s Standards for the Treatment of Historic Properties and understands the complexities behind each restoration and rehabilitation project no matter the type, size or configuration of the historic resource.

Thomas B. Connolly, AIA is the Principal Architect for Connolly & Hickey and holds a Bachelor of Architecture from the New Jersey Institute of Technology. In his nearly twenty years of experience, Tom has gained a complete understanding of the methodologies and philosophies behind the role of historic preservation in the restoration and rehabilitation of historic properties. Tom will manage the review of existing conditions and evaluation, schematic design and design development, and the preparation of the construction documents for the project at the Vanderhoof House. He will also be responsible for administration of the contracts during construction including reviewing all submittals and payment applications, and conducting project meetings.

Margaret M. Hickey, AIA serves as the Historic Preservation Specialist for the firm and is responsible for ensuring all projects comply with preservation standards. Margaret holds a Master of Science in Historic Preservation from Columbia University and a Bachelor of Architecture from the New Jersey Institute of Technology. Margaret will work with the other team members in the review of the existing conditions, schematic design and design development, and preparing contract documents for construction. Margaret will work with the County in the evaluation of general restoration contractors’ qualifications and bidding the project to qualified contractor. She will be responsible for the development of the estimates of probable cost, which will be updated at each phase of the design process.

Mirek L. Skros is responsible for project documentation, delineation, and design and assisting with contract administration. He holds a Master of Architecture from the New Jersey Institute of Technology and will work with Tom in documentation of existing conditions and developing the design and contract documents including the preparation of the technical specifications. Mirek will also assist Tom in administration of the contract during construction.
THE PROJECT TEAM

Robyn Savacool is an Architectural Designer for the firm and is responsible for assisting with existing conditions documentation, drafting existing conditions, and the preparation of design and contract documents. Robyn holds a Bachelor of Architecture from Wentworth Institute of Technology and comes to Connolly & Hickey with an interest in community and economic development. For the Vanderhoef House project, Robyn will work with the other team members throughout the documentation, schematic design, and design development.

James B. Huffman, PE is a consulting structural engineer with over twenty-five years' experience in evaluating historic buildings. Connolly & Hickey has worked with Jim on numerous projects in the past for which he has provided valuable insight, including the thorough evaluation of a building’s structure to determine its condition and integrity, for which he has designed sympathetic repairs and structural upgrades as needed. Jim was the structural engineer for the recently completed Conditions Assessment Report for the Vanderhoef House. For the proposed project, Jim will work with Tom in designing for structural upgrades for the proposed new use.

KSI Consulting Engineers will design for any upgrades to the existing mechanical, electrical and plumbing systems within the Vanderhoef House. James Sarno, PE, is the principal MEP engineer for KSI Consulting and will lead their project team. KSI is a full-service firm and will address all utilities including heating and electrical systems, fire and security detection, communication systems, and any plumbing related to new restroom facilities. The other key members of the firm who will work with Connolly & Hickey are Luis Rodriguez, CFD and Andrew Christie, each offering evaluation and design for each engineering specialty. KSI Consulting recently worked with Connolly & Hickey at Drumthwacket, the Governor’s Mansion in Princeton; the design and expansion of the Carriage House to serve as a Visitor’s Center at the Grover Cleveland Birthplace in Caldwell; and the interior renovation of the Parish House for the Presbyterian Church in Morristown.
TECHNICAL PROPOSAL

Our firm is committed to providing the County with all services required to make this project successful. We include below our general approach to executing the overall goals of the proposed project. Restoration & Rehabilitation of the Vanderhoof House. Connolly & Hickey views this project as a three-staged process: documentation and design development, contract document preparations, and bidding and contract administration.

BASIC SERVICES

Documentation and Design Development

The project will begin with the programming phase. The Project Team will meet with representatives of Passaic County in order to discuss project goals and a preservation philosophy for the Vanderhoof House. Since a full Historic Preservation Report was not prepared for the building, the Project Team feels it is important to develop a chronology of construction and a preservation philosophy that will guide future work at the site. This will require the Project Team to review the existing documentary research related to the history and development of the property, research being conducted (by others) for preparation of the National Register nomination, and the material fabric of the building. The programming phase will also include looking at the proposed uses for the building, undertaking a code analysis, and making detailed recommendations for the adaptive use including schematic design options.

The Project Team will consult the evaluation of conditions outlined in the Conditions Assessment Report; however, the team members will undertake a more detailed assessment in order to prepare the design for rehabilitation and restoration. The work will be conducted with the project engineers, KSI Consulting Engineers, Inc., and James S. Huffman, PE. Jim Huffman’s work will focus on the design for upgrades of the structure including the loads and the floor and roof framing. Additional documentation and analysis of the roof framing will be undertaken and designed for rehabilitation to accommodate an expanded use of the building. This investigation will require the removal of some finish materials in order to fully assess the underlying structure. A general contractor will assist during this destructive investigation, revealing concealed conditions. We anticipate the investigation will take a single day, and all openings will be filled at the end of the work day.

KSI will design all heating, ventilation, lighting, electrical, plumbing, fire, and security detection, including related services upgrades to accommodate the proposed new use. Based on the drawings included in the Conditions Assessment Report and provided by the County, along with in-field measurements, the project team will generate AutoCAD drawings showing as-built conditions. These drawings, which will consist of plans of all floors, exterior elevations, roof plans and a section, shall serve as the base documentation. Connolly & Hickey shall supplement these drawings with detailed documentation where necessary in order to generate complete and detailed design and contract documents.

Connolly & Hickey will prepare Schematic Design Documents that will broadly outline the scope of the project in graphic form, including an estimate of probable cost. At least three schematic design options will be provided and will be primarily for discussion purposes. Connolly & Hickey shall meet with representatives of the County to begin discussions on the design for the adaptive reuse of the Vanderhoof House. Connolly & Hickey will work with the County to fine-tune the scope of work and budget.

Based on the findings of our meeting, Connolly & Hickey shall begin to prepare the Design Development documents, which will entail translating the scope of the project into more detailed drawings and further delineation of the rehabilitation and restoration components. The restoration of the historic fabric including any changes necessary to accommodate the proposed new use will be outlined in plan and elevation, and will be accompanied by preliminary details. During this phase, recommendations for integration of the historic and any new fabric will be delineated. The project team anticipates meeting with the County on at least two occasions during the design development process to discuss overall progress as well as the finer details of the design. At each meeting, the design drawings including any technical specifications will be presented and will define the proposed project for review and consideration by representatives of the County.
TECHNICAL PROPOSAL

Section 3

Contract Documents
The findings of the design development process will be translated into contract documents using plans, elevations, sections and details drawn to sufficient detail to describe the required work including a project manual with technical specifications for the Vanderhoof House. The contract documents will provide adequate information to allow qualified contractors to effectively bid the project and carry out the work. The primary goal for the Vanderhoof House will be to restore and repair select areas of the exterior and interior of the building in order to support the proposed use of the building by the Department of Parks and the Department of Cultural & Historic Affairs.

Documents will be distributed to agencies having jurisdiction over the work for their approval and the Project Team will assist the County in obtaining required approval. While the Vanderhoof House is not currently listed on the New Jersey or National Registers of Historic Places, if it at the time of Contract Document preparation, Connolly & Hickey shall prepare an Application for Project Authorization to the New Jersey Historic Preservation Office (NJHPO) and will respond to any comments or concerns presented by the NJHPO. The firm will also meet with any local representatives that have a vested interest in the preservation of this building to review the scope of the project and obtain feedback.

Throughout the process, we will continue to meet with the County to review the contract documents, to review the details, and to further define the bidding strategy. The bidding strategy will include unit prices, allowances, and possible bid alternates in order to obtain flexibility in the scope of work based upon available funds and to accommodate possible unforeseen conditions. The County will draft all contract and bid requirements given this is a publicly owned property.

Any final comments made by representatives of the County regarding the final design documents will be incorporated into one hundred percent complete contract documents. Final sets of drawings and specifications will be provided to obtain final approvals prior to bidding where required.

Pre-Construction
Contractor Pre-Qualification
The Project Team will assist the County in obtaining competitive bids from qualified contractors by soliciting qualification statements from interested contractors through the approved processes developed by the New Jersey Department of Community Affairs. Connolly & Hickey will prepare the pre-qualification questionnaire and review all qualifications; however, the County shall be responsible for public notifications and hearings associated with the pre-qualification process. Our office provides assistance throughout this process.

Bidding
We recommend obtaining at least three bids from known restoration contractors to perform the work. The Project Team will assist the County in obtaining competitive bids from qualified contractors. We will conduct the pre-bid conference in order to answer questions and will issue addenda as required. The Project Team will tabulate and review the bids and issue a bid finding letter. We will assist in any negotiations with the successful bidder.

Contract Administration Services
Our firm shall be responsible for the preparation of the Owner-Contractor agreement for execution by both parties. A pre-construction meeting will be held to establish the logistical arrangements, work scheduling, and project administration. The Architect will make periodic visits to the site to observe the progress of the work. The Architect will review the Contractor's Requests for Payment and make a recommendation to the County. The Van Riper-Hopper and Van Duyne Houses are fine examples of Dutch-American residences constructed in the eighteenth century. The Van Riper-Hopper House, which is original to its site, and the Van Duyne House, which was moved to its current location in 1974, are two historic house museums that enjoy a beautiful setting adjacent to the Point View Reservoir. The Van Riper-Hopper House was constructed c. 1786 by Uriah Van Riper and was once part of a larger, 145-acre parcel of property that included mills and agricultural lands. The house remained in the Van Riper family until the early-twentieth century. The house was preserved for museum purposes in 1964 when Wayne Township took possession. It is a fine example of Dutch-American architecture that has evolved since it was constructed. Today, its core architecture, interior finishes and features, and exterior massing and detailing continue to reflect its Dutch architectural origins. The Van Duyne House, which is simpler in its architectural detailing, is also a fine example of Dutch-American architecture and is a pre-Revolution house retaining a high degree of architectural integrity.

The roof restoration and structural stabilization of the Van Riper Hopper House was completed in April 2015. The project included stabilization and structural enhancement of the existing roof framing members; restoration of the wood shingle roof, flashings, soffits and dormers; restoration of the roof drainage, window restoration at the dormers; and restoration of existing brick chimneys. The Van Duyne House project has been designed and will include restoration of the wood shingle roof, flashings, fascia, and drip edge; and restoration of the existing brick chimneys.

Historic Preservation Plan

The Wood-Ridge Memorial Library found its permanent home in the Brinkerhoff House in 1954 due to the preservation efforts of Wood-Ridge citizens. The house is the oldest landmark in Wood-Ridge and the only house constructed of native handcut sandstone. George Brinkerhoff built his home in 1792 on a 200-acre farm he purchased in 1784. The building and its land remained in the Brinkerhoff family until 1905 when ownership was passed to Leopold Brandenburg. Brandenburg later became the mayor of Wood-Ridge. Brandenburg used the land for farming and gradually sold it off in parcels. In 1941, the Borough of Wood-Ridge acquired the property for unpaid taxes. The building had been slated for demolition when a campaign began to save it for use as a memorial library. The project was approved under referendum in November 1952 and the building was renovated and dedicated as the Wood-Ridge Memorial Library in September of 1954. The Brinkerhoff House was listed on the National Register of Historic Places in 1994 as part of the Thematic Nomination of Early Stone Houses of Bergen County.

Connolly & Hickey completed a Historic Preservation Plan for the Wood-Ridge Memorial Library in the fall of 2013. The report includes a historical overview with period of significance, documentation of existing conditions of all three building components, and an architectural analysis to maintain the building's use as a library while also making recommendations for compliance with current code requirements, including barrier-free access. The report also made recommendations for future work, included estimates of probable costs, and evaluated structural components and mechanical and electrical systems. The library recently completed a historic restoration focusing on masonry restoration, repair of windows and doors, structural upgrades, and roof restoration at its historic core.

The Historic Ford Faesch House was constructed by Colonel Jacob Ford, Jr. around 1772 and is a fine example of the popular Georgian style architecture of the time. The construction of this residence may have served as the prototype for Ford's Mansion located in Morristown, which is currently interpreted as Washington's Headquarters. The Ford-Faesch House is significant for its association with John Jacob Faesch who leased the residence in 1772. Faesch was an ironmaster who had extensive iron ore holdings, charcoal-producing woodlands, and water-power driven furnaces and forges in the Morris County region. Faesch controlled each of his large-scale financial and industrial ventures, making him instrumental in the development of eighteenth-century industry and transportation in the region. His iron products were critical in Washington's efforts during the Revolution. The house is listed on both the New Jersey and National Registers of Historic Places.

Connolly & Hickey has assisted the Township and the Historical Society with multiple projects. The first phase included masonry repairs at the west wall of the main building and restoration of the roofline of the east kitchen wing. The second phase included the restoration of the exterior masonry, floor framing repair and restoration of the windows at the front elevation. Connolly & Hickey assisted with the third phase, which included restoration of the roofline to its eighteenth-century appearance, and restoration of the remaining windows and exterior doors and front entrance porch. This work provided a sound exterior building envelope. Connolly & Hickey also worked with the Historical Society in the update of their Historic Structure Report, which was prepared in 1995 and details the research and work that has gone into the building since that time. The update was completed in 2014. The next phase will focus on restoration of the West wing and the cooking fireplace in the East wing.

Drumthwacket was constructed in 1835 by New Jersey native Charles Smith Olden, a businessman who achieved his wealth in New Orleans. After living in New Orleans for a number of years, Olden returned to New Jersey in 1834 and constructed Drumthwacket, which means "wooded hill" in Scottish Gaelic. Olden was a gentleman farmer, businessman, president of Princeton University, and state senator while living in New Jersey. He was elected as New Jersey Governor in 1860, serving during the turbulent years of the Civil War. Moses Taylor Pyne purchased the property in 1893. Pyne was a financier, philanthropist, and director of numerous banks, industrial and mercantile companies, railroads, etc. His greatest philanthropic endeavor was at Princeton University, where he made significant financial contributions and influenced the expansion of the University in the late-nineteenth and early-twentieth centuries. Pyne was primarily responsible for the appearance of Drumthwacket today. He expanded the original residence through the construction of the two wings and added hundreds of acres to include park-like landscaping, greenhouses, bridle paths, a dairy farm, and formal Italian gardens. In 1966, the State of New Jersey purchased the property for use as the official residence of the Governor, but the building did not begin to serve this purpose until the mid-1980s. Since that time, the building has also been used for special events and school tours, and is open to the public for guided tours one day a week.

In recent years, the State has made some modifications and upgrades to the building to better accommodate the disabled and the visiting public. Several barrier-free upgrades were completed in 2008, including the removal of interior barriers between rooms, installation of an elevator to the second floor, and the insertion of a barrier-free restroom at the second floor. The current project continues where the 2008 project left off, bridging the gap in the accessible route at the first floor between the west wing and the original center section of the building. Connolly & Hickey designed a small addition at the rear of the building to house an accessible lift. The design looked to the existing solarium but with simple detailing while creating a light-filled space. The exterior patio off the accessible entrance is often used for large gatherings at the Governor's Residence.

RE: AWARD OF CONTRACT TO CONNOLLY & HICKEY FOR PROFESSIONAL SERVICES FOR THE REHABILITATION AND RESTORATION OF THE VANDERHOEF HOUSE, CLIFTON.

Members of the Board:

We are seeking a resolution awarding a contract to Connolly & Hickey Historical Architects, LLC for the preparation of design and contract documents as it pertains to the restoration and rehabilitation of the Vanderhoef House, located in Wensel Brook Park, Clifton.

The Public Works and Building & Grounds Committee recommended that the full Board authorize awarding this contract in effort to preserve and reuse one of the County’s oldest historic structures. I have attached the proposal submitted by Connolly & Hickey Historical Architects LLC., outlining the proposed scope of services, project schedule and the team’s qualifications. Their proposal addresses the challenges presented to preserve and reuse the Vanderhoef House while providing thorough and careful analysis of what is needed to prepare a well set of contract documents for future bidding.

I encourage you to consider adopting this resolution. If you have any questions, please do not hesitate to contact me.

Sincerely
